## EXPERIENCE

### **Enzyme Health** Austin, TX — *Full Stack Developer*

January 2019 - Present

Designed and developed a patent pending on-demand routing system that matches telemedicine consults to the best qualified clinician.

### **Everfest** Austin, TX — *Full Stack Developer*

October 2017 - December 2018

Modernized a server-rendered Rails application through the development of a React/Redux SPA and accompanying API endpoints.

Product epic owner for several projects, including a ticket sales feature grossing over \$100,000 in the first month and becoming the company's primary focus.

Assembled and deployed weekly releases while communicating with stakeholders the content, impact, and schedule of each release.

### **Clickup** Palo Alto, CA — *Product Manager & Frontend Developer*

May 2017 - September 2017

Collaborated with executive leadership to shape product roadmap.

Managed nine developers, three designers to execute the project's plans.

Implemented BI systems used for MA, AB testing, and campaign optimizations.

Developed high impact features in Angular4, allowing for a premium product offering.

### **Layr Consulting (Acquired)** Austin, TX — *Full Stack Developer*

June 2015 - March 2017

Developed features for an AngularJS SPA powered by a RoR API on top of a multi-billion row MySQL database.

Acted as the point of contact for clients and stakeholders. Delivering rapid prototypes and cost estimates for new projects and features.

### **Edgecase (Acquired)** Austin, TX — *DevOps Intern*

May 2014 - September 2014

Designed and Developed an internal CMS using google scripts.

### **Texas State University** San Marcos, TX — *System Admin/ Student Worker*

July 2012 - August 2015

Managed, configured and deployed any and all university services.
