 - AngularJS
 - Ruby on Rails
 - Material Design
 - Bootstrap
 - PHP
 - Wordpress (and creating wordpress plugins)
-

Experience

Software Engineer at Layr consulting

June 2015 - Present (1 year 9 months)

Full-stack development and support for enterprise solutions focused on efficient development and user experience.

I'm responsible for everything from meeting with clients to creating backend API.

Systems Administrator, Student Worker at Texas State University

July 2012 - July 2015 (3 years 1 month)

I was employed by the Core Systems Department, responsible for configuring and supporting all university department's services as well as core business services such as SAP.

I was personally responsible for maintaining reliable and effective hardware at Texas State University's three main data centers containing around 200 servers.

Dev-Ops Intern at Edgecase.io

May 2014 - September 2014 (5 months)

I identified a major bottleneck in the company's day to day operation, then designed and developed a custom CMS to increase productivity and reduce rework of that bottleneck.

Education

Texas State University

Bachelor's Degree, Computer Science, 2010 - 2015

Activities and Societies: Mu Sigma Nu, former president; Texas State Student Government, Senator; Honor's College
